III. Re-inoculation Probiotics: The Microbial Matrix - Part 2

Scroll down to Sources at bottom of page to read the scientific journals on each bacterial overgrowth and the probiotic strains that help prevent and eradicate the pathogenic bacteria and balance the microbiome.

Please Repeat the probiotics you've been taking from Program for the next 3 months (MegaSporeBiotic, Bifidobacterium, Saccharomyces Boulardii etc).

Four to Five Months after the program, refer to your notes from your personal lab results and the add in new strains of beneficial bacteria listed below based on the Unfavorable Microbes listed in your lab results:

D. Targeted Probiotics: (For SIBO Positive AND Negative)

Please locate the pathogenic bacteria you found on your test as described in the video and purchase the specific probiotic strains for your specific strains. If the probiotics overlap for whatever reason DO NOT

purchase them twice. Simply purchase ONE round for 8 weeks as described in the directions below.

Scroll down to Sources at bottom of page to read the scientific journals on each bacterial overgrowth and the probiotic strains that help prevent and eradicate the pathogenic bacteria and balance the microbiome.

1. *Anaeroglobus geminatus*

Probiotics: *Lactobacillus casei*

Ther-Biotic Vital-10 (1 bottle)

(*Lactobacillus casei*)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v085-10-vital-10-tm>

2. *Burkholderia pseudomallei*

Burkholderia pseudomallei is an opportunistic pathogen. We recommend taking GI Synergy to drive down this pathogen.

GI Synergy: (1 Container - 90 packets)

<https://amzn.to/3xUStlL>

3. *Blastomyces gilchristii*

Verdict: *blastomyces gilchristii* is a fungi which is mold spores are converted into a pathogenic yeast once the spores are inhaled. Eradication: GI Synergy (contains 3 products in 1 - one of which is called Paristonal which is a product that fight fungal overgrowth). Probiotics to fight fungal infections:

Lactobacillus acidophilus, *Lactobacillus casei*, *Saccharomyces boulardii*, *Lactobacillus rhamnosus*

Lacto-Prime Plus (1 bottle)

(Lactobacillus rhamnosus, Lactobacillus acidophilus, Lactobacillus casei)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

4. Campylobacter (C. jejuni, C. coli and C. lari)

Probiotic Strains : L. salivarius, L. reuteri

Ther-Biotic Lacto-Prime Plus (1 bottle)

(Lactobacillus salivarius)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

Ther-Biotic Symbiotic (1 bottle)

(Lactobacillus reuteri)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v777-ther-biotic-synbiotic>

5. Candidiasis (albicans ... any strain)

Probiotic strains: Lactobacillus acidophilus, Lactobacillus casei, Saccharomyces boulardii

Ther-Biotic Vital-10 (1 bottle)

(Lactobacillus acidophilus, Lactobacillus casei)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v085-10-vital-10-tm>

6. Citrobacter

Probiotic strains : L. plantarum, L. salivarius, L. casei, L. acidophilus, B. lactis and B. bifidum, Lactobacillus rhamnosus

Ther-Biotic Lacto-Prime Plus (1 bottle)

(Lactobacillus rhamnosus, Lactobacillus acidophilus, Lactobacillus casei, Lactobacillus plantarum Lactobacillus salivarius, Bifidobacterium bifidum, Bifidobacterium lactis)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

7. Clostridioides difficile

(C-Diff):

Probiotic Strains: Saccharomyces boulardii, Lactobacillus rhamnosus, Lactobacillus reuteri)

(C. Diff is a bacteria that is labeled a “super bug.” All this means is that it is caused by the overuse of antibiotics in our culture and cannot be killed with anti-biotics as it is resistant to them through micro-evolution. C. Diff runs rampant historically in hospitals and can often be seeded in the gut during a time of surgery or even from a visit to a loved one in a hospital. It also is a pandemic in factory (CAFO) farms as anti-biotics are violently abused in the husbandry of our meat/poultry supply. It is an anti-biotic resistant super bug. Ironically it’s conventionally addressed using MORE antibiotics to bring it under control. But obviously, being that C. Diff is an anti-biotic resistant super bug, any additional antibiotics can further weaken the gut microbiome and immune system even further - so

it's counterintuitive. To rebalance the gut microbiome and prevent a future reoccurrence of C. Diff overgrowth, it's best to use herbal methods so as to not decimate beneficial bacteria in your the gut microbiome but rather being down the levels of C. Diff and build up a healthy community of strong beneficial bacteria to fight off C. Diff in the future. Garlic does this expertly as well as boosting stomach acid (HCl) to prevent reoccurrence. Do not take garlic if you have SIBO but instead take Allicin which is a constituent of garlic but won't aggravate SIBO).

Ther-Biotic Symbiotic (1 bottle)

(Lactobacillus reuteri, Lactobacillus rhamnosus)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v777-ther-biotic-synbiotic>

8. Enterotoxigenic e. coli (ETEC) LT/ST

Probiotics: Lactobacillus reuteri, Lactobacillus Plantarum,
Saccharomyces: Pediococcus acidilactici and S. cerevisiae
boulardii, Lactobacillus rhamnosus, Lactobacillus
johnsonii, bacillus licheniformis

Ther-Biotic Symbiotic (1 bottle)

(Lactobacillus reuteri, Lactobacillus Plantarum, Lactobacillus rhamnosus)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v777-ther-biotic-synbiotic>

9. Enterobacter (hormaechei, cloacae)

Probiotic Strains: *Bacillus coagulans*, *Bifidobacterium Bifidum*, *B. longum*, *B. infantis*, *L. plantarum*, *Saccharomyces boulardii*, *L. paracasei*, *B. lactis*, *L. rhamnosus*, *L. acidophilus*, *L. casei*, *Lactobacillus salivarius*, *Lactobacillus reuteri*, *Lactobacillus bulgaricus*, *Streptococcus thermophilus*)

Ther-Biotic Vital -10 (1 bottle)

(Lactobacillus acidophilus, Bifidobacterium bifidum, Lactobacillus bulgaricus, Lactobacillus rhamnosus, Lactobacillus brevis, Lactobacillus casei, Lactobacillus salivarius, Lactobacillus plantarum, Streptococcus thermophilus, Bifidobacterium lactis)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v085-10-vital-10-tm>

Ther-Biotic Symbiotic (1 bottle)

(Lactobacillus plantarum, Bifidobacterium lactis, Lactobacillus rhamnosus, Lactobacillus acidophilus, Lactobacillus paracasei, Lactobacillus reuteri, Bifidobacterium bifidum)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v777-ther-biotic-synbiotic>

10. *Enterococcus faecium*, ...

Probiotic Strain: *L. rhamnosus*

Ther-Biotic Factor 1 (1 bottle)

(L. rhamnosus)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v771-06-ther-biotic-factor-1>

11. Escherichia coli (E. coli) O157:H7

Probiotics: Bifidobacterium breve, L. rhamnosus and L. acidophilus, Saccharomyces Boulardii, Lactobacillus reuteri, Lactobacillus plantarum, Bifidobacterium longum, Bifidobacterium infantis

Bifidus Power Blend: (2 bottles)

(*Bifidobacterium breve*, *Bifidobacterium longum*, *Bifidobacterium infantis*)

<https://bit.ly/3NljnPN>

Ther-Biotic Symbiotic (1 bottle)

(*L. rhamnosus*, *L. acidophilus*, *Lactobacillus reuteri*, *Lactobacillus plantarum*)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v777-ther-biotic-synbiotic>

12. Haemophilus Influenzae

Probiotic Strains: L. plantarum, Bifidobacterium longum, Bifidobacterium infantis, Bifidobacterium breve, B. Bifidum, Bifidobacterium animalis subsp. lactis HN019, L. paracasei, Lactobacillus rhamnosus, L. Gasseri, Lactobacillus reuteri, L. salivarius, Lactobacillus *bulgaricus*, Streptococcus *thermophilus*

Lacto-Prime Plus (1 bottle)

(*L. plantarum*, *L. salivarius*, *L. acidophilus*, *Lactobacillus paracasei*, *Bifidobacterium lactis*, *Bifidobacterium longum*, *Bifidobacterium bifidum*)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

Ther-Biotic Symbiotic (1 bottle)

(Lactobacillus paracasei)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v777-ther-biotic-synbiotic>

Ther-Biotic Vital -10 (1 bottle)

(Lactobacillus acidophilus, Bifidobacterium bifidum, Lactobacillus bulgaricus, Lactobacillus rhamnosus, Lactobacillus brevis, Lactobacillus casei, Lactobacillus salivarius, Lactobacillus plantarum, Streptococcus thermophilus, Bifidobacterium lactis)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v085-10-vital-10-tm>

13. H. Pylori

Probiotic Strains to fight/protect against H. Pylori:

Lactobacillus gasseri, Bifidobacteria, Saccaromyces Boulardii, Lactobacillus casei

There-biotic Vital-10

(Lactobacillus casei)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v085-10-vital-10-tm>

14. Klebsiella pneumoniae

Probiotic Strains: Bifidobacterium longum, L. plantarum, L.

salivarius, *L. casei*, *L. acidophilus*, *Bifidobacterium lactis*,
B. bifidum

Lacto-Prime Plus (1 bottle)

(*L. plantarum*, *L. salivarius*, *L. casei*, *L. acidophilus*, *Bifidobacterium lactis*, *Bifidobacterium longum*, *Bifidobacterium bifidum*)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

15. Methanobrevibacter smithii (M smithii)

Probiotic strains: *L. plantarum*, *Lactobacillus reuteri*, *L. salivarius*, *L. casei*, *L. acidophilus*, *Bifidobacterium lactis* and
Bifidobacterium bifidum

Lacto-Prime Plus (1 bottle)

(*Lactobacillus Plantarum*, *Lactobacillus casei*, *Lactobacillus salivarius*, *Bifidobacterium lactis*, *Bifidobacterium bifidum*)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

Ther-Biotic Symbiotic (1 bottle)

(*L. rhamnosus*, *L. acidophilus*, *L. rhamnosus*, *Lactobacillus reuteri*,
Lactobacillus plantarum)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v777-ther-biotic-synbiotic>

16. *Prevotella copri*

Probiotic Strains: *Lactobacillus acidophilus*, *Lactobacillus casei*, *Bifidobacterium bifidum*

Lacto-Prime Plus (1 bottle)

(*Lactobacillus casei*, *Lactobacillus acidophilus*,
Bifidobacterium bifidum)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

17. *Proteus spp*

Probiotic Strains: *Lactobacillus Plantarum*, *Lactobacillus casei*

Lacto-Prime Plus (1 bottle)

(*Lactobacillus plantarum*, *Lactobacillus casei*)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

18. *Salmonella enterica*

Probiotic Strains: *Lactobacillus Plantarum*, *Bifidobacterium Bifidum*

Salmonella is an enteric pathogenic bacteria. It resides in the biofilm of the gut and attaches to the epithelial layer of the gut lining.

Ther-Biotic Symbiotic (1 bottle)

(*Lactobacillus plantarum*, *Bifidobacterium bifidum*)

Klaire Labs: Register as patient. Use Code: 78G
<https://klaire.com/v777-ther-biotic-synbiotic>

19. *Salmonella enteritidis*

Probiotic Strains: *Saccaromyces Boulardii*, *Bacillus Subtilis*, *Lactobacillus Plantarum*, *Bifidobacterium Bifidum*

Salmonella is an enteric pathogenic bacteria. It resides in the biofilm of the gut and attaches to the epithelial layer of the gut lining.

Ther-Biotic Symbiotic (1 bottle)

(*Lactobacillus plantarum*, *Bifidobacterium bifidum*)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v777-ther-biotic-synbiotic>

20. *Salmonella typhimurium*

Probiotic Strains: *Saccaromyces Boulardii*, *Lactobacillus Plantarum*

Salmonella is an enteric pathogenic bacteria. It resides in the biofilm of the gut and attaches to the epithelial layer of the gut lining.

Saccharomyces Boulardii (1 bottle)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/v776-12-saccharomyces-boulardii>

(Many Salmonella Strains)

Ideal Bowel Support by Jarrow Formulas : (1 bottle)

(*Lactobacillus family*)

Klaire Labs: Register as patient. Use Code: 78G

<https://klaire.com/k-lpp-lactoprime-plus>

32. *Pseudomonas aeruginosa*

Lactobacillus rhamnosus, *Bifidobacterium longum*

Histamine Reducing Probiotic (2 bottles)

(*B. Longum*, *Lactobacillus rhamnosus*)

<https://bit.ly/3NloMns>

33. *Trypanosoma cruzi*

Here is the verdict: It's a Parasite. *Trypanosoma cruzi* is a flagellate protozoan.

Eradication Plan: Do the Parasite protocol and recipe plan. Weeks 1-4 you will follow the eradication supplements based on if you have SIBO or not. Then in weeks 5-8 you will swap out GI Synergy for the parasite supplement (either R.U.G. or SCRAM and follow the directions on the back of the bottle, slowly increasing pills as instructions on back of bottle)

1. *Anaeroglobus geminatus*

Research:

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8539185/>

"Recent papers have demonstrated substantial alterations in the gut and oral microbiota in patients with rheumatoid arthritis (RA)..."

"RA has long been associated with periodontal disease [19], and recent evidence on the oral microbiome has emphasized its role in the arthritis."

"RA is an autoimmune disease affecting the synovium and cartilage with bony erosion. Recently, the relationship between the oral microbiome and systemic diseases has been explored [21,22]. Sher et al. demonstrated that overall exposure to *Porphyromonas gingivalis* was similar between patients with RA and controls. These authors found an abundance of ***Anaeroglobus geminatus*** that correlates with the

presence of rheumatoid factors, and *Prevotella* and *Leptotrichia* species are the only taxa that have been observed in patients with new-onset RA [22].”

<https://www.mdpi.com/2077-0383/8/10/1753>

Lactobacillus casei

<https://www.mdpi.com/2077-0383/8/10/1753>

“*Anaeroglobus geminatus* were later added to the list of microbes associated with increased disease severity in RA (Rheumatoid Arthritis).”

“*Prevotella copri* (Pc) was discovered in new-onset, untreated RA (NORA) patients, as an intestinal microbe correlated with disease activity [32]. Increases in Pc abundance correlated with a reduction in *Bacteroides* and a loss of beneficial microbes in NORA patients.”

In human subjects with RA, supplementation of *Lactobacillus acidophilus*, *Lactobacillus casei*, and *Bifidobacterium bifidum* for eight weeks exhibited an improvement in disease activity score, a significant decrease in serum insulin, and high sensitivity C- reactive protein (hsCRP) levels

10. Enterococcus (faecium ...)

L. rhamnosus

<https://journals.asm.org/doi/10.1128/AEM.01243-16>

11. Escherichia coli (E. coli) O157:H7

L. rhamnosus, L. acidophilus, bifidobacterium breve, Saccharomyces boulardii, Bifidobacterium animalis, Lactobacillus reuteri, Lactobacillus acidophilus, Lactobacillus plantarum, Lactobacillus rhamnosus, Bifidobacterium longum Bifidobacterium infantis

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6069398/>

<https://pubmed.ncbi.nlm.nih.gov/10424093/>

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1201237/>

12. Haemophilus Influenzae

Probiotic Strains: L. plantarum, Bifidobacterium longum, Bifidobacterium infantis, Bifidobacterium breve, B. Bifidum, Bifidobacterium animalis subsp. lactis HN019, L. paracasei ,Lactobacillus rhamnosus, L. Gasseri, Lactobacillus reuteri, L. salivarius, Lactobacillus bulgaricus, Streptococcus thermophilus

A bacteria. (Does not cause the influenza flu.) This bacteria that could cause infections which severe cases could contribute to respiratory infections, ocular infection, sepsis and meningiti, ear infections & pneumonia, bloodstream infections, bronchitis and septic arthritis. Haemophilus influenzae type b is the most common type. It usually affects children under the age of 5 or older people who are immunocompromised.

Lactobacillus rhamnosus: (modulates immune function, helps prevent gastrointestinal and respiratory tract infections)

30. Streptococcus suis:

Lactobacillus plantarum

<https://www.sciencedirect.com/science/article/abs/pii/S0882401017308677>

31. Overgrowth of Parasites

Probiotics strains to fight overgrowth:

(*Lactobacillus Plantarum*, *Lactobacillus reuteri*, *Lactobacillus casei*)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3182331/>

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6799552/>

32. Pseudomonas aeruginosa

Lactobacillus rhamnosus, Bifidobacterium longum

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7556188/>

33. Tryanosoma Cruzi

Here is the verdict: It's a Parasite. Tryanosoma cruzi is a flagellate protozoan.

Eradication Plan: Do the Parasite protocol and recipe plan. Weeks 1-4 you will follow the eradication supplements based on if you have SIBO or not. Then in weeks 5-8 you will swap out GI Synergy for the parasite supplement (either R.U.G. or SCRAM and follow the directions on the back of the bottle, slowly increasing pills as instructions on back of bottle)

Probiotic strains needed:

Lactobacillus casei

Research:

[https://www.researchgate.net/publication/51687710 Probiotics for the Control of Parasites An Overview](https://www.researchgate.net/publication/51687710_Probiotics_for_the_Control_of_Parasites_An_Overview)

34. Vibrio cholerae, cholera toxin gene (ctx)

Lactobacillus rhamnosus, Bifidobacterium longum

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3763660/>
